

SV2 Hospital Bed

Customisable to fit your needs

The next standard of care.

Creating a hospital bed like our SV2 takes collaboration. By working together with medical professionals like you all over the world, we are delivering a high-quality bed you can customise to your specific needs.

The SV2 is a feature-rich, value-driven bed that includes electronic controls with convenient, one-touch button positioning for both you and your patients, a low bed indicator, mobile headboard, optional fifth wheel, optional under-bed lighting and much more.

Low bed indicator

Clearly indicates to caregivers when the SV2 is in its lowest position, helping to reduce patient injury from falls.

Fifth wheel mobility

Enhances maneuverability, helping to reduce caregiver back injuries.

Smart egress

One-touch button brings bed surface to its exiting height, helping to reduce patient falls.

Fold-down siderails

Simplify patient exiting, while enhancing safety by fully covering and minimising entrapment gaps. Allowing ease of use for caregivers by tucking away with only one hand.

Double regression

Allows backrest and knee-gatch regression to help reduce both sacral pressure and displacement of the patient.

Mobile headboard

Easily adjustable bed height for a more ergonomic positioning for the caregivers.

"Always-on" underbed light

Offers patients better sight during the night when exiting the bed, helping to reduce falls.

Making a difference. Reducing our impact.

When we make products like our SV2 bed, we seek ways to use less and waste less – because we consider the wellbeing of our planet to be as significant as the health of the individuals who live on it.

SV2 Hospital Bed

Stryker's Regional Headquarters
 Herikerbergweg 110
